

# SMART AIR MONGOLIA

Newsletter

Join us on launch of our Kickstarter campaign on Tuesday, May 21.

Smart Air is a certified B Corp on a mission to make clean air affordable for everybody. For years, big air purifier companies have made clean air over-priced and over-complicated. The truth is that purifiers are simple: a fan and a filter is all you need to breathe clean air in your home. Because most people don't know the science behind purifiers, companies use flashy marketing to trick us into spending thousands of dollars on fancy-sounding machines. The **Sqair** is different. It gives effective, streamlined clean air without all the distracting gimmicks. The numbers speak for themselves: the **Sqair** gives more clean air for less money than all other major purifiers--and it's quieter.
